

African Swine Fever (ASF)

FREE ZONE

Pig & Poultry Farming

African Swine Fever (ASF) a severe viral, transboundary animal (TAD) disease affecting domestic and wild pigs. It is responsible for serious production & economic losses.

> There is **no vaccine against ASF - cure is impossible!**

Biosecurity measures are essential!

In this context, **Kersia** is committed to supporting pig farms through offering complete and comprehensive and tested biosecurity products and solutions, through our **"Cleaning, Disinfection and Protection" Programs.**

CLEANING

Effective cleaning of surfaces and equipment ensures the best possible condition for disinfection.

PROTECTION

Comprehensive Biosecurity measures are required to prevent micro-organisms from re-entering and contaminating clean buildings and equipment.

DISINFECTION

Successful disinfection is the elimination of micro-organisms through the selection of a proven disinfectant, applied at the correct dilution rate with adequate contact time.

ASF - TOO SERIOUS to simply rely on marketing claims!

Virex, Fumagri Effisafe, Hypred Force 7, Virosshield and Virobacter were all successfully tested against the ASF Virus at Wageningen University (NL) and/or Instituto Valenciano de Microbiología (ES) according to the standard efficacy test method EN14675.

Test method EN14675	Concentration	Degrees	Contact time	FBS (soiling)	Where / Virus
VIREX	1%	4°C	5 min.	BSA 3 g/L	Wageningen University (NL)*
FUMAGRI EFFISAFE	1%	10°C	1 min.	BSA 3 g/L	
HYPRED FORCE 7	1%	10°C	30 min.	BSA 3 g/L	
HYPRED FORCE 7**	1%	10°C	30 min.	BSA 3 g/L	Instituto Valenciano de Microbiología (ES) **/**
VIROSHIELD**	1%	10°C	30 min.	BSA 3 g/L	
VIROBACTER***	1%	10°C	30 min.	BSA 3 g/L	

* the Netherlands '86 ASFV isolated on porcine alveolar macrophages

** using the surrogated Vaccinia Poxvirus (ATCC-VR-1508)

*** using the surrogated Vaccinia virus strain modified Vaccinia Ankara (MVA)
