

VIROPHOR 2.8%

An iodine-based disinfectant suitable for disinfection of foot wear and surfaces in animal and poultry housing.

VIROPHOR 2.8%

VIROPHOR 2.8%

ADVANTAGES

- · Broad spectrum disinfectant based on Iodine
- Bactericidal, Virucidal and Yeasticidal efficacy
- For surfaces in animal houses or farms
- For disinfection of boot / footwear immersion

Surface Disinfection in livestock housing

Spray and Foam application at low pressure – only by trained personnel:

Pre-clean surfaces and equipment to be disinfected. Apply the diluted product by spraying at low pressure or foaming at an average rate of 300 ml/m² up to the limit of runoff at 10°C minimum:

Bactericidal & yeasticidal: 2% / ≥ 1 minute contact time
 Virucidal: 2% / ≥ 30 minutes contact time

Footwear Disinfection / Boot Disinfection

Application by dipping / boot bath application - only by trained personnel:

Pre-clean boots to be disinfected. Prepare on a daily base a dilution of VIROPHOR 2.8% at the recommended rate and apply it by dipping boots at a min. of 10°C:

• Bactericidal & Yeasticidal: 2% / ≥ 1 minute contact time

Keep foot dip covered when not in use. Specific instruction that this product is for use as a boot dip under supervised conditions only. It is prohibited from use as a general boot scrub/ disinfectant.

BACTERICIDAL EFFICACY

EN 14349 & EN 1656 / 2% / 1 MIN. / 10°C / low soiling (Enterococcus hirae, Proteus vulgaris, Pseudomonas aeruginosa, Staphylococcus aureus)

YEASTICIDAL EFFICACY

EN 16438 & EN 1657 / 2% / 1 min. / 10°C / low soiling (Candida albicans)

VIRUCIDAL EFFICACY

EN 14675 / 2% / 30 MIN. / 10°C / low soiling (Bovine Enterovirus type 1 (ECBO))

EFFICACY - DEFRA

At a dilution rate of 1 ml disinfectant plus 550 ml water Foot and Mouth Disease: 1:550

At a dilution rate of 1 ml disinfectant plus 150 ml water Swine vesicular Disease: 1:150

At a dilution rate of 1 ml disinfectant plus 99 ml water Diseases of Poultry Order (Newcastle): 1:99

Avian Influenza Order: 1:99 Influenza of Avian Origin in Mammals: 1:99

At a dilution rate of 1 ml disinfectant plus 50 ml water

General orders

At a dilution rate of 1 ml disinfectant plus 20 ml water

Tuberculosis: 1:20

Active substance: Iodine

Caution: To be used by trained professionals - trained in the use of this product and also with respect to the

specified PPE/RPE. Due to the corrosive nature of the concentrate and diluted product it is not suitable

for general use by untrained farm operatives.

Risk mitigation: Feed, water and troughs are to be covered during biocidal treatment. Wash hands thoroughly

after handling. Wear protective gloves/protective clothing/eye protection/face protection.

Storage: Keep in a clean, cool and well-ventilated place away from sources of heat and intense light. Store in

tightly closed original container. Protect from frost. Store below 25°C and out of direct sunlight.

Shelf Life: 24 months from date of manufacture.
