OUR GOALS

- + To optimise hygiene performance on your production site
- + To preserve the quality of your food
- + To respect and preserve operators' hands

A COMPLETE, EFFICIENT SOLUTION

1

WASH

- Optimises Disinfection
- Removes irritating residues left by the production processes to prevent occupational dermatitis
- Contains gentle soap to preserve the skin's natural barrier
- Use disinfectant soap to complete the Stage 2 disinfectant action

2

DISINFECT

- Eliminates micro-organisms and reduces risk of food contamination
- The active ingrediances offer a broad spectrum of activity for increased efficiency
- No rinsing necessary to prevent the risk of contamination by water
- Is not a substitute for washing hands

3

REPAIR

- Prevents skin disorders to improve hand-cleaning. Optimum hand-cleaning lowers the risk of food contamination
- Protects workers' skin
- Helps to combat occupational dermatitis

PARTNER FOR YOUR PERFORMANCE
IN THE AGRI-FOOD INDUSTRY
COSMETICS RANGE

OUR PRODUCTS

SOFTY TOUCH' HYPOALLERGENIC

In the food industry, workers often suffer from skin disorders: dryness, irritation, etc. Our aim is to respect and protect workers' health. SOFTY TOUCH' is a hypoallergenic soap, formulated using ingredients selected for their excellent dermal compatibility.

- + Dermatologically tested
- + Close to the skin's physiological pH level
- + Formulated using surfactants selected for their excellent dermal compatibility
- + Excellent cleaning effect
- + Fragrance and colourant-free

BOOST CREAM WORKING TIME

Thanks to the included active ingredients found naturally in the skin, BOOST CREAM nourishes deep down. Glycerine improves skin suppleness and gives a feeling of comfort throughout the working day. Urea promote rehydration of the skin. Collagen is a film-forming agent which produces a continuous film over the skin.

- + Nourishing cream
- + Softens skin
- + Emollient properties
- + Dermatologically tested
- + Rapid absorption
- + Non-greasy texture
- + Fragrance- and colourant-free
