BOTTLE SHINE

Complete Program for Glass Protection and Optimized masking to

- protect Brand image
- optimize Global Cost
- preserve Bottle Resources

BOTTLE SHINE PROGRAM

GLASS PROTECTION

Patented bottle washing additive MIX PROTECT

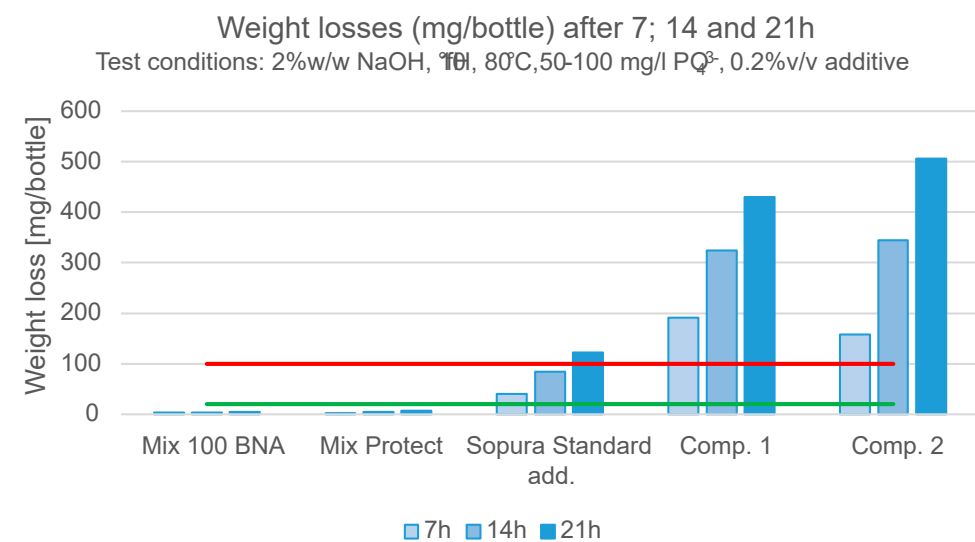

MIX PROTECT + MFF NG 85

- MIX PROTECT as booster of detergency and glass protection
- MFF NG 85 as antifoaming agent
- For an optimal glass protection solution
- Protective approach on new bottles
- Proactive approach on scuffed bottles

SOPURA
anti-scuffing
additive

Standard
additive

BENEFITS

- ➔ Heavy duty detergency against fruit pulp residues, fruit fly larvae, molds etc.
- ➔ Glass protection properties
- ➔ EDTA-free
- ➔ TCO savings
- ➔ Reduced impact on wastewater treatment plant

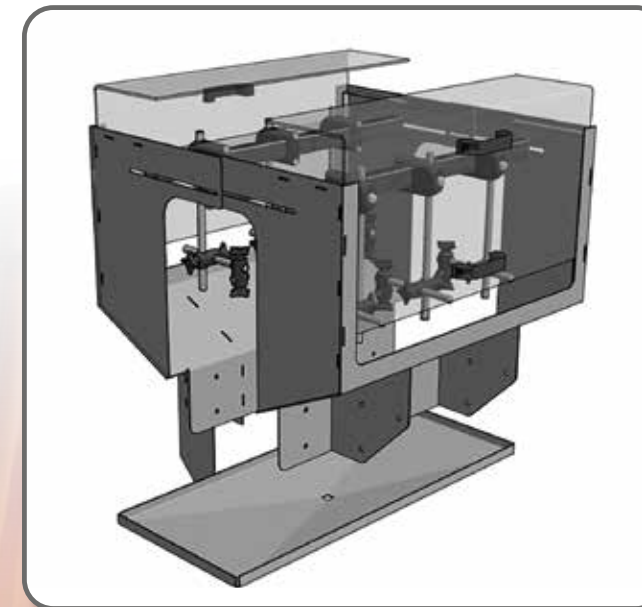

SCUFF MASKING SOLUTIONS

Innovative masking product SOPURMASK and adapted application equipment JETCOAT

JETCOAT

- Modular equipment for easy installation
- No line modification
- Low consumption through
 - Nozzles with pulse modulation
 - Dosing based on the line speed

SOPURMASK

- Food safe product
- Ice bucket and condensation resistant coating
- Applicable before or after labeler on cold or warm bottles
- No impact on bottle washing and wastewater treatment plant
