

RUMISTART GREEN

An energetic booster to support the milking ruminants

RUMISTART GREEN

WHAT ?

Propylene glycol (vegetal origin) and Sorbitol
 • Energy intake

Energy

Digestive system

Volatile Fatty Acids and sodium propionate
 • Energy intake

Yeast extracts and cobalt
 • Ruminal activity stimulation

WHICH RESULTS ?

The product has been tested in **10 Danish farms**. The farmers noticed that there was more traffic at the milking robots from young and old cows.

RUMISTART GREEN appears to be a new "generation" of a product that provides **energy that is easy to use**.

Denmark Sales Team

HOW ?

Distribute **RUMISTART GREEN** orally:

- ✓ Into mouth or upon the diet
- ✓ Into water (in the tank or individually into bucket upon calving)
- ✓ Through automatic distributors or through milking robot

Liquid

Cows	End of gestation (dry cows/heifers)	50 to 100 mL for 1 week before calving
	After calving or before IA	200 to 300 mL/cow/day, during 5 to 6 days
