

Hydrafeed

STARTER

Aliment complémentaire diététique effervescent pour jeunes ruminants

- ✓ Stabilisation du bilan des électrolytes et de l'eau afin de faciliter la digestion physiologique

Effervescent dietetic complementary feed for young ruminants

- ✓ Stabilization of water and electrolyte balance to facilitate the physiological digestion

Sachet poudre
Powder sachet

The effervescent dietetic complementary feed specially intended for young ruminants in times of risk of **digestive disorders** (diarrhea), during and after these

Advantages of HYDRAFEED[®]

- Complete intake of electrolytes
- Contains lactose
- Effervescent and palatable pellets

Unique formula

- Complete intake of **electrolytes**
- Highly assimilated **energy intake**
- Contains **lactose**
- Effervescent and **highly palatable** product
- **Granulated** formula: all the active elements are combined in each pellet

Why use HYDRAFEED ?

- Provides all the necessary elements to **stabilize water and electrolyte balance** to facilitate the **physiological digestion** (NRC, 2001; Sayed, 2011).
- Brings a large intake of quickly assimilated **energy**.
- Helps to a **quick** return to milk diet **without transition**.
- Hydrafeed[®] dissolves **easily** and **quickly** in addition to being **highly palatable**.

Instruction for use

Dissolve a sachet of Hydrafeed or a 100g dose (a measuring cup) in 2L of lukewarm water, to be dispensed at meal times, 2 to 3 times per day
If no improvement is noted after 3 days, consult a veterinary surgeon.
